**Subject:** Re: TCRS - sampling and lab

Kent,

Thanks for the update & the field effort as well. We can plan on a catch up on Tuesday.

The ECHA call has introduced some interesting considerations for sampling & analysis. More on Tuesday.

We have signed form from  Elizabeth should be able to schedule at convenient time.

Safe travels. Annette.

PS: I am at RDU en route to SMF. Back on Tuesday morning.

Hi Annette:

We collected samples from two synthetic turf fields this morning and got the samples into overnight shipment to the laboratory. Some interesting features for these fields/samples we can discuss later.

Don, Karen, and I talked to Xiaoyu to go over near-term schedules for providing samples to the NRMRL chamber lab, and providing the sampling tubes they need to collect samples. I think we have a plan that will work moving forward.

There are a number of other technical issues that we are dealing with as we work through these processes for the first time.

I am continuing to think about scheduling and will try to get more information about when our contractor is likely to be available to initiate lab support and field sampling.

We will be back at the lab by tomorrow afternoon to check on things. I may need to take off Monday for child care reasons.

Best wishes,  
Kent
